Kippo

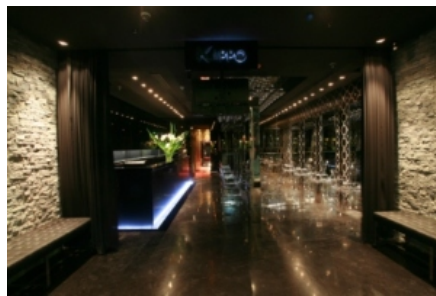

[Wed 20/01/2010 10:12:41]

Located in Sydney's CBD, Kippo's flagship salon has a brand new look. An exemplary example of 'east meets west', the salon provides modern luxury with more than a nod to the past.

Kippo's moody interior has an almost gothic feel with slick black high gloss and reflective finishes offset by pendant lights and Philippe Starck furniture. A feature wall of mosaic tiles mimics Asian-inspired motifs of the past but reinterpreted in a luxurious and modern way.

The shopfront is dominated by two towering terracotta statues imported from Beijing that sit alongside raw granite.

The VIP rooms echo a traditional Emperor's chamber in China with a gold mosaic wall and red Bisazza stone flooring – Philippe Starck's famous Fiam Caadre mirror is also a fixture.

A recent partnership with Joico sees the full Joico K-PAK colour and hair care and styling products on offer – Kippo were the state

winner of Joico's Innovision competition in 2009.

Famous for their thermal reconditioning system, Kippo introduced the revolutionary technique into the Australian market nearly a decade ago and have had several 'before and afters' published in magazines such as *Marie Claire*, *CLEO* and *New Woman*.

2009 saw them introduce a new Keratin smoothing system into their salons – one of the first in Sydney's CBD to offer the technology. Eliminating frizz and relaxing curls, the revolutionary technology leaves hair softer, healthier and more manageable.
